DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 5-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Wright et al. (Transportation Engineering Planning and Design, 1989). As discussed by Wright et al., the steps as claimed are standard practice in transportation design.

Further regarding claim 1, note that Wright discloses an area (page 402) which includes a body of water (Chattahoochee River).

Regarding limitations of road, floating road, bridge, etc., all are within the scope of the of the discussion of Wright et al. and inherent to use in certain design situations. Further, note that the term "area" has not been given any particular patentable weight since an area could be of any dimension. Also note that the limitations regarding proximity to water are inherent in many design applications, and are within the scope of "environmental" considerations discussed by Wright et al.

Response to Arguments

3. Applicant's arguments filed 7/15/2002 have been fully considered but they are not persuasive. Applicant's arguments regarding using a body of water to support a roadway are

moot because the claim limitations are so broad that this configuration is not necessary in order to meet claim limitations. In other words, the limitations of the claims as presently recited do not introduce concepts not covered by standard engineering practice with respect to road design. In order to patentably distinguish the claims, the claims must positively recite steps used that are not simply standard design practice.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
